

Musicbrainz_erd_modeled

Eiler Schiotz and Nicole Currrens | February 23, 2020

The attributes listed are how the attributes of the entities are described in the Music Brainz documentation. In our actual data the attribute names are just the datatype and column number. We will need to manually rename the columns at a later point in time.

Some of our PK-FK relationships are matching different datatypes to the same attribute. This can cause difficulties when writing queries, which will require type-casting.

Event		
PK	id	Integer
	name	String
	begin_date_year	String
	begin_date_month	String
	begin_date_day	String
	end_date_year	String
	end_date_month	String
	end_date_day	String
	time	String
	type	Integer
	cancelled	String
	setlist	String
	alias	String
	disambiguation comment	String
	annotation	String
	last_updated	Timestamp
	edits_pending	Boolean

URL		
PK	id	Integer
	gid	String
	url	String
	edits_pending	Integer
	last_updated	Timestamp
